Problem Statement

You are given strings s and t . Find one longest string that is a subsequence of both s and t .

Notes

A *subsequence* of a string x is the string obtained by removing zero or more characters from x and concatenating the remaining characters without changing the order.

Constraints

- s and t are strings consisting of lowercase English letters.
- $1 \leq |s|, |t| \leq 3000$

Input

Input is given from Standard Input in the following format:

```
s
t
```

Output

Print one longest string that is a subsequence of both s and t . If there are multiple such strings, any of them will be accepted.
